

Incident Management Situation Report
Friday October 9, 2026 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned

Totals

Initial attack activity:	Light (72 fires)
New large incidents:	1
Large fires contained:	2
Uncontained large fires:	8
CIMTs committed:	2
NIMOs committed:	0

TOTAL FIRES:		2,840	2,479	197	372	52,534	5,259	63,681
TOTAL ACRES:		239,344	3,396,286	98,711	92,625	3,681,136	1,505,384	9,013,486

Ten Year Average	Quantity	% of Ten Year Average
Fires (2016 – 2025 as of today)	47,686	134%
Acres (2016 – 2025 as of today)	6,204,304	145%

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

A major pattern change will develop today as a trough aloft drops south across the West with a strong leading cold front. Winds ahead of the front may gust as high as 50 mph across the high terrain and lee slopes from southern California to Montana. Temperatures will still be hot and relative humidity still dry and a wide swath of near critical to critical fire weather is expected for Montana and Wyoming and near the Sierra Front. Hot and dry conditions with east winds gusting 15 to 35 mph will bring a critical burn environment to the lower Mississippi Valley out ahead of Hurricane Isaias. By late Friday night, Isaias is anticipated to make landfall bringing heavy rain, strong winds, and storm surge to the Gulf Coast. Cooler temperatures, moderated relative humidity, and light rain are expected across Washington state and western Oregon.
