

Incident Management Situation Report
Saturday July 11, 2026 – 0730 MDT
National Preparedness Level 4

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (164 fires)
New large incidents:	7
Large fires contained:	0
Uncontained large fires:	42
CIMTs committed:	15
NIMOs committed:	0

[Understanding the IMSR](#)

[IMSR Map](#)

Two MAFFS C-130 airtankers and support personnel from the 146th Airlift Wing (CA Air National Guard) have been deployed to San Bernardino, CA and Santa Maria, CA to support wildland fire operations nationally.

New fires:	22
New large incidents:	1
Uncontained large fires:	7
CIMTs Committed:	5

Claremont, Ada County. CIMT (EA Team 1). One mile northeast of Boise, ID. Grass and brush. Minimal fire behavior with backing, creeping and isolated torching. Numerous structures and energy infrastructure threatened. Area, road and trail closures in effect.

Cottonwood, Fishlake NF, USFS. CIMT (GB Team 4). Five miles east of Beaver, UT. Timber, brush and light slash. Moderate fire behavior with single tree torching, creeping and smoldering. Numerous residences and critical infrastructure threatened. Evacuations, area, road and trail closures in effect.

Babylon, Manti-La Sal NF, USFS. CIMT (GB Team 2). CIMT (GB Team 6) mobilizing. Twenty-five miles southwest of Monticello, UT. Brush, closed timber litter and timber. Extreme fire behavior with crowning, short crown runs and wind-driven runs. Structures and critical infrastructure threatened. Area, road and trail closures in effect.

Jim Mtn, Elko District, BLM. Sixteen miles north of Montello, NV. Grass, brush and timber. Minimal fire behavior with smoldering and single tree torching. Energy infrastructure threatened.

Wild Goose, Fishlake NF, USFS. Transfer of command from CIMT (GB Team 7) back to the local unit will occur today. Twelve miles northeast of Fillmore, UT. Timber, brush and grass. Minimal fire behavior with creeping and smoldering. Communication infrastructure threatened. Area, road and trail closures in effect.

* **Martin**, Twin Falls District, BLM. Two miles east of Bellevue, ID. Brush and grass. Minimal fire behavior with smoldering. Last report unless significant activity occurs.

Ten Year Average	Quantity	% of Ten Year Average
Fires (2016 – 2025 as of today)	29,799	130%
Acres (2016 – 2025 as of today)	2,556,476	135%

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Above normal temperatures will combine with breezy southwest to west winds at 12-22 mph with gusts to 30 mph and afternoon relative humidities of 5-15% to elevate fire weather conditions across the western Great Basin, northeastern California, northern Rockies, and much of the Inland Northwest. Extreme heat is expected over the lower elevations of the Intermountain West and the Northern Great Plains.

Scattered showers and thunderstorms will begin to work their way northward into southeastern Arizona as monsoonal moisture advances northward out of Mexico. Scattered storms are also likely once again over parts of eastern New Mexico. Further to the east, isolated storms are possible over parts of the northern Great Lakes with more widespread showers and storms expected over the Mid-Mississippi and Ohio Valleys. Scattered showers and storms will occur over parts of the Southeast. Hot and breezy conditions are expected over the eastern Carolinas and Florida elevating fire potential once again outside of any thunderstorms that develop. Very warm and mainly dry conditions will continue in northeast Minnesota. Above normal temperatures will persist across the eastern Interior of Alaska with isolated thunderstorms, while cooler conditions across the western half of the state.
